The New Currency Wars

by Alan David 12 / 20 /2019.

When I was a much younger man, in the year 1984, and lived in a middle class Southern California town called Redondo Beach, I learned something I had never heard of before about what is called “Money”, and “currency”.

My father had only recently returned from Northern California where he had to travel to handle his fathers Estate, after his father had died at the age of 84, where he lived in Scots Valley, California.

I had known that my Grand father was a big collector of Numismatic Coins because he had come by our house on a few occasions to take us to a yearly ‘California Numismatic Coin Association’ ‘Coin Convention’ when my brother, sister, and I were very young, in elementary school.

I remember one year when my mother, father, cousin Marsha, brother James and sister Lee Anne went with our grand father to a Hotel in down town Los Angeles to attend the yearly California Numismatic Association Coin convention banquet, and after everyone was seated at their tables, a man addressing the attendees, announced through a microphone that:

At each table there was a .999 pure silver coin under one of the plates, and we should all look under our plates to see if we were the lucky recipient.

At our table the silver coin was under my plate, and I was stunned to find it sitting there. I later gave it to my mother for safe keeping. It later disappeared after someone broke into our house while none of us was home, and they took money & things of value.

After my father returned from his trip up North to settle his fathers Estate, I noticed a trunk was placed out at the curb for the garbage man to pick up, and my curiosity got the better of me, so I went over to the trunk and lifted the lid to have a look at what was inside.

What I found interested me. It was a number of books on coins, and currency of the United States, and some news paper articles about my grand father. As I stood there and began to read one of the Articles I was surprised at what I found.

It stated that my grand father came to America on a boat in 1900, after being born at sea on that boat, before he arrived.

The article further stated that he had been a member of the first US Air Force, and at one time he was the mechanic for Fighter Pilot Eddie Rickenbachers fighter plane. I had heard that Rickenbacher had been the most decorated American pilot in WW I.

The article also said my grand father was the founder of the San Jose (California) Coin Club, and at one time he had the largest coin collection in the United States.

I never checked to see if these stories were true, though later, after my father died in October of 2010 at the age of 83, I found a specialty numismatic coin that had apparently been privately minted, commemorating the Founding of the San Jose Coin Club, which had the image of my grand father on it, and it stated his name, as a 'Charter Member' and 'Founder' of the 'San Jose Coin Club'. I still have that coin today.

As I began to read the beginning of one of the books that I found in that trunk, I was again surprised. It was a book about currency, paper, and coin money of the United States, and what it said, even today makes me wonder.

It stated that at some time before the Declaration of Independence and Founding of the 'United States of America' the American colonies used sticks as currency !

I found this to be far from my own idea of how the 'money system' worked ! *I could not at that time even conceive how you could have a financial system based on mere sticks !*

Well, since then I have learned and realized that it is only a matter of agreement, and anyone can agree to make anything a 'currency', even Popsicle sticks, or rocks that would include that yellow mineral rock called 'gold', or another mineral rock called silver !

Civilization in the so called 'Western World' has been purportedly based on something called "The Law Of Nations", which was written about by a man by the name of Emer De Vattel in his world famous Law Treatise called 'The Law Of Nations'; See the copy of the title page of the book included at the end of this Article. The full & complete title of that book is:

**THE LAW OF NATIONS
OR THE PRINCIPLES OF NATURAL LAW**
**Applied to the Conduct and to the Affairs
of Nations and of Sovereigns
by Emer De Vattel .**

Some years Later when I began to research law I found out that the ‘Law of Nations’ was really the law of Treaties, Compacts, and Contracts’. In other words agreements between Nations, States, Governments, or put even more simply, Sovereigns. The concept originated out of the Royals, or the Royal bloodline families of the world, who formed various agreements between each others Kingdoms, Monarchies, & Empires.

For their to be a lawful binding agreement there must first be a meeting of the minds between the contracting parties, before there can be a meeting of the minds, there must be a full disclosure by both parties to the other of all material facts affecting the others rights and interests in the proposed transaction. It is only after these elements have been met that there can be a lawfully binding agreement, contract, compact, or treaty.

So then, what happens when there is no agreement, but disagreement ? Or as they say ‘we must agree to disagree’. Usually a conflict arises which can lead or build up to use of force and violence, ultimately a state of war around the world because of the varied and diverse interests that proliferate our planet, and the intense competition between those conflicting interests.

When disagreements arise people tend to get more emotional than usual, and that means they will focus more on their negative and dark emotions, when frustration leads them into bitter disappointment when fantasy expectations are not fulfilled as planned and hoped for such as ‘Utopia’ and ‘Paradise’; instead we may get a form of ‘hell on Earth’ by the powers that be, who really do not care about the dreams, desires, fantasies and expectations of the many who chase after ‘the American Dream’, or ‘heaven on Earth’.

Though this may be convenient for the few elitists who apparently want to force their will on the many by any means in their possession and power, to me it is a very dangerous proposition very likely to end in a number or succession of destructive events culminating in a dooms day scenario in the Future if solutions are not found and arrived at fast.

The state of conflict now apparent in the ‘United States of America’ ‘Body Politic’ & corporate empire is clearly illustrative of this point.

That is why I think that the new idea formulated by my friend Joe Baker called Remedy Coin is so brilliant. It seeks to provide a real remedy for those who have been unjustly, wrongly harmed and injured, where there has been no obtainable remedy previously, due to a lack of Justice, where the truth and the facts in reality, have been merely discarded, swept under the rug, or intentionally ignored.

In the year 2011 Anno Domini James Rickards published a book titled “CURRENCY WARS” with the sub title “THE MAKING OF THE NEXT GLOBAL CRISIS”. I am writing to you now about a new form of ‘CURRENCY WAR’ that is now under way

all around planet Earth, right under your nose, escalating and accelerating as I write this, even though you may not have heard about it yet.

Does anyone out there want to open up a Popsicle Stick Bank and Stock Exchange ? No ? Well, I did not think so, but it was worth a try, right ? To some people it may be worth a try, *but not me;*

The forgoing paragraph was merely for illustrative purposes, as a preparatory mental exercise for the subject we are about to enter into now, *which is a new form of 'currency war'* that is taking place as we speak, around the world, including here in the USA and abroad, as you will soon see.

Having taken several College University level courses on relevant subjects such as Economics, Micro and Macro Economics, Business Law, and Real Estate Law, as well as a 'Paralegal' course which included how to run a Law Office, etc., and over 40 years of researching the dark side of the world, 28 years researching law, history of the USA, concealed, covert, and occult history, world history including Archaeology, ancient cultures, ancient spiritual teachings, I have a comprehensive knowledge about the 'Law' system of the USA, the 'money' and 'currency systems', as well as the State and Federal Government systems that have developed from the founding of the USA to the present state of affairs, where we now find ourselves; *in the modern age, in a global economy and its 'global' 'economic system'.*

Whether or not you are aware, we have all been living in the middle of a state of war in this world, on multiple levels. Today, as Alex Jones founder of 'InfoWars.com' would attest, *we are in the middle of an Information War, in the middle of the greatest information Age in known history.*

In this, the first in a series of Articles to come, I will be focusing on *Economic warfare, specifically currency wars, & The New Currency War.*

In my experience these subjects are not really known or understood by most people I have met. Back in the year 2009 my friend, and personal computer expert, Joseph Baker, now the creator and founder of 'Remedy Coin', came walking down the hall from the computer room in the house I was living in at the time, and approached me, saying that I should buy some Bitcoin.

I replied back, 'what's bitcoin' ? He proceeded to tell me it was a new kind of electronic currency, but I was still totally in the dark, having no clue about what any of that meant.

As time went on I learned that the technology which was the *operating system* for the new 'Crypto Currency' called 'Bitcoin', was called 'Block Chain'. Joe told me at that time that this was allegedly an untraceable way to engage in private transactions online. The

people using the system to purchase products, etc., allegedly could not be taxed, because the transactions were totally anonymous.

I was instantly skeptical, because being an expert on the so called 'legal system' and an expert on "Law", including 'Constitutional' and 'tax law', I knew that if it was actually true that this 'new' 'crypto currency' was 'untraceable', and 'could not be taxed', the Federal Government, the International Bankers, and the people who ran the Internal Revenue Service & Income Taxing System, would change that situation to their favor and benefit, if there was any way in Heaven, Hell, or Earth to do so, and it was only a matter of time before they would be pursuing the matter, with all the resources available to them through the 'United States' 'Federal Government'.

Needless to say, although I really liked the idea of an untraceable crypto currency, I never purchased any 'Bitcoin', because I did not want to get in the scope & cross hairs of the Federal Government & IRS as someone who was involved in what they would surely try to label was some kind of tax evasion scheme, which might get me targeted even more than I might already be targeted by them !

In the interim, since those days I have taken notice in 2014 of the Congressional hearings in the US Congress that were held concerning Bitcoin, and so called 'crypto currencies', which I concluded was really an investigation to determine the best way to obtain 'regulatory power' & 'control' over 'crypto currencies' so that the Federal Government could somehow get their 'pound of flesh', or should I say 'share' of 'Federal Taxes' from the use of such 'commercial' 'instruments' by 'American taxpayers'.

After the hearings the Congress found that Bitcoin and 'Crypto Currencies' were a valid commodity, that could be traded on the stock markets.

This was quite a convenient finding which subsequently allowed the SEC (the U. S. Security and Exchange Commission) to sell licenses for trading and selling crypto currencies on exchanges across the country, and, of course, that meant they would have the power to regulate and tax them, which is what I knew they really wanted in the first place.

Coincidentally ? , in the same year, 2014, a new development concerning 'Cyber Security' appeared in the US Government, As part of the CMF (cyber Mission Force) 'construct', US CYBERCOM activated a 'Cyber National Mission Force Headquarters' (CNMF-HQ) at a NSA headquarters ceremony Jan. 17, 2014.

The CNMF has built their personnel force to a total of approximately 1, 900 as of the end of 2017. The CNMF's mission is stated to "plan, direct, and synchronize full spectrum cyberspace operations to deter, disrupt, and if necessary, defeat adversary cyber actions in order to defend the nation."

US CYBERCOM was created in the same year that bitcoin was introduced to the world, 2009, around mid 2009 at the NSA ‘National Security Agency’ which is in Fort Meade, Maryland. Could this be again only another ‘co-incidence’ ? ?

According to available information on the internet, including its website, as well as sites such as Wikipedia.com, the ‘US CYBERCOM’ was created as a ‘defensive mission’, but has grown into an ‘independent combat unit’, viewed as not only a defensive force, but an offensive force as well, since May of 2018.

‘Cyber Warfare’ is something that has only existed in our present ‘modern age’ & is an unprecedented development in the history of humankind on this planet, in all of our known history.

Before 2014 I was saying that governments and the powers that be are going to want to use BlockChain technology for themselves, their Agencies including Police, Law Enforcement, & Military, & so would the Banks, because by its very description it is the perfect technology to establish a high state of anonymity & therefore privacy, but it is also a perfect defensive cover, from behind which to engage in cyber warfare !

This was very clear to me, and that sooner or later they would want total possession and control over the technology, which would mean taking it away from individuals, including possibly an outright ban by law, or limiting it to licensed corporations, & registered usage by individuals by paid membership, etc. which would make the individual easily track-able.

Ultimately, I told a few close friends that this could be used as the ‘Anti-Christ, mark of the beast’ world government system predicted in the New Testament of the King James Bible of 1611, because it could provide perfect security and anonymity by which those running a World Government tyrannical dictatorship could easily hide behind as they Dominate & Rule the masses of the whole world by advanced technology !

I am talking about technology most of us have not even seen yet here in America, though a form of such a system is now operational in the Capitol of China where every individual is tracked everywhere they go by the new Smart Grid 5G system, which is only partially up in the Eastern part of the USA.

Recently I have come across proof that my predictions are now beginning to come true, here in the US and around the world, & the changes are coming fast, as I document them for disclosure to my current and future readers benefit. But please be sitting down when you read this stuff, it is pretty heavy duty, & I don’t want anyone to faint from the shocking impact of the revelations !

Is everybody sitting down ? Yes, OK, here we go:

The New Currency War unfolding before us is Crypto Currencies VS National Currencies which should be fairly clear to the reader after reading the following information:

It was recently reported by Tech Insider & Million dollar Investor Jeff Brown in an article he wrote that the Government of India has recently stated that individuals should not be allowed to have Crypto Currencies. I note for your attention that it did not say that Governments or Corporations should not have Crypto Currencies !

The US Government Department of Treasury, & FINCEN, recently issued a statement saying that Bitcoin is a haven for Chinese drug Cartels ! Shortly after that statement the Government of China issued a statement that all Crypto Currency Exchanges are banned in China !

At the recent G 7 meeting in August 2019, in Europe attended by US President Donald Trump, a Leader of the French Government stated Crypto Currencies can not be allowed to be a threat to National Currencies. At the same G 7 conference some official from Great Britain at the conference stated that the US should abandon the dollar, and adopt a crypto currency, like Liber Lite.

**A recent reported statement by the [European Economic and Social Committee](#):
*We Must Not Let Blockchain Create a 'New Digital Economy Elite'***

Recently it was announced that the Government of the Marshal Islands released a statement they were adopting an official Crypto Currency.

The Chinese Government recently announced their National Bank is setting up a National crypto currency, & the Government recently instituted an accelerated educational program for its citizens to bring them up to speed on the essentials of the crypto currency. I will be writing more about the Chinese Crypto currency system in my following Articles. But for now I point out for your attention, that it said the *Chinese National Bank was doing it, not the Government*, which should give you a clue when you read the next paragraphs;

**A recent article had this headline:
*"China Further Limits Digital Privacy, Increasing Potential Cryptocurrency Use"***

In the Youtube.com trailer titled "Money Revealed" at 23:34 the author of the book "The Creature From Jekyll Island", about the secret creation of the Federal Reserve Banking System, G. Edward Griffin stated the following:

"The largest Exchanges and Crypto Currencies are dominated by Banking interests,

and they're not stupid. If the public had known that the form legislation was written by the bankers they would never have gone for it. There's a real name for that, it's called Cartels."

DAVID ZEILER, Associate Editor, *Money Morning* @DavidGZeiler

recently wrote an article Titled:

"Could President Trump Enact a Bitcoin Ban?" on September 19, 2019.

in that article Zeiler stated:

'President Trump is on the record as having his doubts about crypto. In July he tweeted:

"I am not a fan of Bitcoin and other Cryptocurrencies, which are not money, and whose value is highly volatile and based on thin air. Unregulated Crypto Assets can facilitate unlawful behavior, including drug trade and other illegal activity...."

Other recent Article headlines stated:

"The European Central Bank Moves Closer to Issuing a Digital Currency"

"Apollo Currency Signs MOU With Nation of Lesotho as Part of Blockchain Initiative"

Bitcoin PR Buzz November 17, 2019 Press Releases."

"World Economic Forum To Build Blockchain Platform For Responsible Sourcing Of Metals" October 25, 2019, 8:16AM EDT

by Yogita Khatri

The following excerpt is from the article titled:

"OFFICIAL RELEASE Bretton Woods II" By Teeka Tiwari

Nov. 20, 2019, 11:46 AM

"US central bankers have explored the possibility of developing a digital currency that would be directly available to businesses and households, Federal Reserve Chairman Jerome Powell confirmed to lawmakers this week. "While we are not currently developing a central bank digital currency, we have assessed and we continue to carefully analyze the costs and benefits of pursuing such an initiative in the U.S.," Powell wrote in a letter to lawmakers dated Tuesday.

A digital currency backed by the central bank in the largest economy would be unprecedented and raise a host of legal and operational questions. Powell said it would be closely considered by policymakers but added that the US could be in some ways better positioned than other countries that have looked into such a proposal.

"We are carefully monitoring the activities of other central banks to identify potential benefits that may be relevant in the U.S. context," he wrote. "To date, our observation is that many of the challenges they hope to address do not apply to the U.S."

The letter was a response to questions raised by Republican Rep. French Hill of Arkansas and Democratic Rep. Bill Foster of Illinois, who in September said the central bank should consider a US-backed cryptocurrency to remain competitive.

"We are concerned that the primacy of the U.S. Dollar could be in long-term jeopardy from wide adoption of digital fiat currencies," the lawmakers wrote in the initial letter to Powell, adding that "it may become increasingly imperative that the Federal Reserve take up the project of developing a U.S. dollar digital currency." Digital-currency proposals have emerged throughout the private sector over the past year — including at Facebook, JPMorgan, and Wells Fargo — though some policymakers have flagged them as potential risks to monetary policy and financial regulations. "I think we agree that Libra raises a lot of serious concerns, and those would include around privacy, money laundering, consumer protection, financial stability," Powell said in July of the digital coin announced by Facebook last year. "Those are going to need to be thoroughly and publicly assessed and evaluated before this proceeds."

This final excerpt is from the article titled:

“ Hungarian Central Bank Reveals Fintech Strategy to Foster Financial Innovation”

By [Rick D.](#)

“The central bank of Hungary, the MNB, has just published its first strategy on fintech. The plans aim to bring greater digitization to the domestic financial sector in the country. The report, titled ‘Financial Innovation and Stability,’ is the product of central bank collaboration with Hungarian companies working in the fintech industry. It is comprised of a total of 24 new proposals and initiatives. The Magyar Nemzeti Bank believes it important to move quickly towards the digitization of the financial system. As a part of

this strategy, the proposals put forward include efforts to improve financial knowledge and training for those involved in the industry.

Aiding with the implementation of the new strategy will be an executive team established in May of this year. The Supervisory Lab for Financial Innovations will monitor the international development of fintech solutions and work towards implementing them in the Hungarian financial system. Similarly, the MNB strategy is being supported by the Digitalization and FinTech Advisory Board, set up by the bank in September of 2019.

Hungary is not particularly known for its fintech industry — something that the new strategy will aim to address. It only became a member of the European Blockchain Partnership, this February.

The new MNB strategy, despite claiming to foster innovation in the financial industry, makes no clear reference to either Bitcoin or cryptocurrency. Like many central banks, the MNB has previously warned the public about the potential risks associated with digital currencies but is yet to properly regulate the industry.”

Finally, I will conclude this article with the following:

On November 15, 2019 previously cited ‘Tech insider’ & millionaire investor Jeff Brown published an article entitled:

“Four Tech Billionaires Declare War on the U.S. Dollar”

wherein Brown stated:

“ Mark Zuckerberg is planning a new WORLD CURRENCY BASED ON CRYPTO, AND HE’S NOT THE ONLY ONE”...

I have only scratched the tip of the ice burg here, there is much more I will be going into in the article that will follow, but for now suffice it to say that at present there are at least 4 large and powerful corporations that have or are working on a near future release of their own crypto currency, which you may have heard about by now, which are Google, Facebook, Amazon, and Apple. Rest assured there are more, and there are more governments & central banks who are involved, which I have not yet mentioned, so stay tuned for the next article, as it all becomes clearer and clearer.

Alan David

THE LAW OF NATIONS
OR THE PRINCIPLES OF NATURAL LAW

Applied to the Conduct and to the Affairs of
Nations and of Sovereigns

BY E. DE VATTEL

“For there is nothing on earth more acceptable to
that Supreme Deity who rules over this whole world than
the councils and assemblages of men bound together by
law, which are called States.”

—Cicero, *Somnium Scipionis*.

VOLUME THREE
