The New Currency Wars

by Alan David, 4/3/2020.

**This is Part 4 in an ongoing series of Articles on economic warfare:
“The New Currency Wars”.**

In an article published back on November 11, 2019, by JP Buntinx, for themerkle.com, titled “**The IRS Confirms A New Wave of Cryptocurrency Audits is Coming**” the author stated that tax agencies around the globe are continuing to crack down on cryptocurrency users, citing A joint report by IRS, with other agencies, whereby they apparently confirm there are tools being deployed to identify tax evaders, cyber criminals, & others, further confirming that taxing authorities from around the world have been working together for some time now for this joint purpose. Could one of these “tools” be the NSA: “National Security Agency”? This information hearkens back to my number two (2), in this series at page 6-8, in the article I cited, written by Tyler Durden dated Wed, 03/21/18, revealing that the NSA was in fact tracking, hacking, collecting data, from Bitcoin transactors at least as far back as 2013. I personally, for reasons & causes, I will not now reveal, suspect that in fact they were onto Bitcoin from the get go, & had data on the users from early on, shortly after they made their public appearance, which is, of course, covered up, & a later version of the surveillance is released, as

they always skew the time line of their black ops, & that is all I will say for now.

This Joint international unit is said to be composed of not only the IRS, which is under the US Department of Treasury, but, they are teaming up with Officials from the Governments of the United Kingdom, Canada, Australia, & the Netherlands. Their purpose is said to be to track down tax evaders and cyber criminals !

Buntinx further states that in the last two years the focus of this organization has shifted to the crypto currency industry, saying that Bitcoin & Altcoins have caused the IRS “quite a few headaches” because of the “pseudonymity” of the users, it is apparently not so easy to prove who is moving money or currency at any given time. Furthermore, it is stated that the IRS recently confirmed that they will be doing more crypto currency audits in the near future, after they sent out thousands of letters to cryptocurrency holders in the first half of 2019, which was apparently a warning to comply with IRS tax filing requirements. Where all this may be going is an unanswered question, that is still up in the air, awaiting some new revolutionary changes in the financial transaction laws in the USA, & around the world.

Well, don't look now, but those changes may be coming faster than we know. According, again, to JP Buntinx, in his followup article for themerkle.com titled “Law Firm Predicts More Lawsuits by IRS Against Crypto Tax Evaders” published on February 26, 2020. Referring to a third party source, a US law firm, by the name of Klasing Associates, Buntinx states that the Law Firm expects more prosecutions against crypto currency

users . Buntinx says that the IRS has sent out 1040 forms with additional questions for “recipients to “ answer ” .

According to Buntinx “cryptocurrencies” “are not designed for ”, “ or even useful for”, “evading taxes”, and “the transparent nature of BlockChain makes it impossible to avoid detection for long.”

This is, of course, not the story I had heard more than ten years ago, back in 2009, shortly after Bitcoin made its initial appearance on the scene, when I had heard the story that, it was “untraceable”, and “could not be taxed”, which, if true, would make it the perfect way to exclude the IRS from any knowledge of who was involved in what transactions.

Some readers may have a question in their mind, such as:

can the IRS really tax someone for having crypto currency ?

The taxing system of the USA is a self assessing system, totally dependent on voluntary compliance with the taxing laws, due to the impracticality of a single agency doing separate reviews of each and every one of the hundreds of millions of public citizens who may be subject to taxing regulations under the Federal & State laws.

The cost of such an undertaking & the man hours to do so would be too over burdensome, & going through the whole required procedure for each and every individual might take several years each, so it is impractical as well. This was admitted to by the IRS in an Official Report they issued back in the 1950's.

The key to analyzing whether or not an individual may or may not be liable to pay the alleged “income tax” can be found in a case_

published by the Supreme Court of the United States of America, in 1946, titled:

Commissioner of Internal Revenue v. Wilcox, 327 U.S. 404 (1946), where the Federal High Court stated the following about determining liability under the alleged “Income Tax”:

“Section 22(a) is cast in broad, sweeping terms. It ‘indicates the purpose of Congress to use the full measure of its taxing power within those definable categories.’ Helvering v. Clifford, supra, 309 U.S. 334, 60 S. Ct. 556. The very essence of taxable income, as that concept is used in Section 22(a), is the accrual of some gain, profit or benefit to the taxpayer.

This requirement of gain, of course, must be read in its statutory context. Not every benefit received by a taxpayer from his labor or investment necessarily renders him taxable.

Nor is mere dominion over money or property decisive in all cases. In fact, no single conclusive criterion has yet been found to determine in all situations what is a sufficient gain to support the imposition of an income tax. No more can be said in general, than, that all relevant facts and circumstances must be considered. See Magill, Taxable Income (1945). [327 U.S. 404, 408]

For present purposes, however, it is enough to note that a taxable gain is conditioned upon:

- (1) the presence of a claim of right to the alleged gain, and**
- (2) the absence of a definite, unconditional obligation to repay or return that which would otherwise constitute a**

gain.

Without some bonafide legal or equitable claim, even though it be contingent or contested in nature, the taxpayer cannot be said to have received any gain or profit within the reach of Section 22(a). See *North American Oil v. Burnet*, 286 U.S. 417, 424 , 52 S.Ct. 613, 615.

Nor can taxable income accrue from the mere receipt of property or money which one is obliged to return or repay to the rightful owner, as in the case of a loan or credit.

Under the new currency system implemented by the US Congress in 1933, the Nations paper currency became “Federal Reserve Notes”, replacing the former United States Bills which served as the Nations currency prior to the new currency law of 1933, signed into law by President Franklin Delano Roosevelt. In fact, in the debates in Congress before the new proposed statutory legislation was passed, it was explained by the speaker that the new currency was in fact a loan from the creditor class to the debtor class, and was a Mortgage on every citizens property and labor. Of course, a Mortgage is a loan, and it is credit, not taxable under the Federal income tax, as explained numerous times by the US Supreme Court in a number of published cases, including the case I have quoted from here in this Article, COMMISSIONER OF INTERNAL REVENUE v. WILCOX, 327 U.S. 404 (1946), which further stated:

“Taxable income may arise, to be sure, from the use or in connection with the use of such property. Thus if the taxpayer uses the property himself so as to secure a gain or profit therefrom, he may be taxable to that extent. And if the unconditional indebtedness is cancelled or retired, taxable income may adhere, under certain circumstances, to the taxpayer. But, apart from such factors, the bare receipt of

property or money wholly belonging to another, lacks the essential characteristics of a gain or profit within the meaning of Section 22(a)."

Well, then, just how is the Federal Government collecting the so called income tax, *the puzzled reader might wonder ?*

The Federal Government can require a “for profit” business that is required to be licensed by law, such as Corporations & Banks, to agree to pay the “income tax” or other taxes, as a condition of obtaining the privilege of securing a license to do business in the Corporate form, which is entirely a legal fiction, not obtainable or doable by any Right of an individual; but is only a mere conditional privilege that can be granted and taken away by the Government.

If you are not a voluntary employee of such a legal fiction, but are doing work as an individual, by private contract under your guaranteed inalienable Rights under the Bill of Rights of the USA, & you provide all your own tools, & equipment for the work that you do, according to your own discretion and control, then you are not liable under the so called “income tax”, but are a “private contractor ”.

Furthermore, if you are totally ignorant about these facts, & volunteer to pay an “Excise”, that is merely called “Income tax” as a ‘term of art’, or an “Artifice” of law, *that you do not owe under the law, be warned :*

the IRS is authorized to accept gifts under the taxing code, & will do so, without notice to you, assuming you knew what you were doing when you sent them the voluntary payment, which they receive as a “gift” from you, being the generous “citizen” you obviously are !

As a number of courts have expressly stated in writing, the individual is responsible for knowing their own Rights under the laws, [remember the common law maxim “Ignorance of the Law is no excuse” ?] and the limits of power & authority of government Agencies they deal with , and the individual deals with such agencies at their own peril, if they be ignorant of their rights & the limits imposed by the law !

See the Unanimous Declaration of Independence of July 4,1776; Articles of Confederation of 1778; Constitution of the uSA of 1787; the Federalist Papers by John Jay; James Madison; & Alexander Hamilton; Bill of unalienable Rights of 1791; US Supreme Court ruling in Chisolm Executor vs the state of Georgia, 2 Dall 419 (1793); Ex Parte Milligan, 4 Wall 2 (1866); Yick Wo vs Hopkins, 118 US 356 (1886); Hale vs Hinkel, 201 US 43 (1906); Myers vs United States, 272 US 52 (1926); Home Building & Loan Assn. vs Blaisdell 290 US 624 (1934); US vs Butler, 297 US 1 (1936); Murdock vs Pennsylvania 319 US 105 (1943); West Virginia State Board of Education vs Barnette 319 US 624 (1943); Reid vs Covert 357 US 1 (1957); Griswold vs Connecticut 381 US 479 (1965); Miranda vs state of Arizona 384 US 436 (1966);

If you do not know, then you are incompetent to handle your own legal affairs & perhaps should consider securing the services of an expert Lawyer, well experienced in the subjects you are involving yourself in, otherwise you may be engaging in pure folly, “getting in over your head” as some like to say !

I learned from reading court rulings long ago that the so called “Employer-Employee Relationship” is based on the Master-Servant Relationship, which previously was the Master-Slave Relationship, before slavery was outlawed in the United States of America !

Under the Master-Servant Relationship you are operating under a statutory privilege, a special status defined by statutory law, by

which voluntary taking of the privilege, you have subordinated your former unalienable Rights under the Bill of Rights, to the Rules & Regulations of the Corporate Employee privilege, which means you are taxable on the Corporate wages you receive from the privileged licensed fictional entity that you work for, because it is obtained under the licensed Corporate privilege of your “Master”, the licensed corporation !

In most cases, you may likely be financially better off operating as a private contractor, and keeping most, or all of your compensation for your labor, instead of voluntarily handing over 60-70 percent of it to the Taxing Agency !

But that is your choice, entirely up to you ! You can be the servant of a corporation, if you so choose, and they agree to take you on as one of their loyal servant-employees !

In future articles I will be updating you on fast changes around the world, regarding the global Banks joining with, sponsoring, & supporting the revolution in crypto currencies, for what appears to be a coming world crypto currency system, to eventually replace the physical debt currency systems we have now under the Federal Reserve Banks, & the Bank of International Settlements”, otherwise known as BIS, located in Basil Switzerland, said to control all the Federal Reserve Banks on Earth.

That brings me to the current world wide “corona virus” “emergency” that is being credited, or blamed for, the recent stock market crash, and apparent economic chaos around the world. Some researchers in the alternative news community are saying this is really a catalyst and vehicle for acceleration of the new global re-set of the economy with the new digital currency system they say the globalists are eager to install, to get out of the global currency debt mess they have created for the last 100 + years of the Federal Reserve Banking fiasco !

Recently over the course of a few weeks, the stock market dropped more than 5000 points, eventually falling more than % 35 per cent. The stock market first dropped over 10 percent, in a number of days, some 3000 points, then on Monday March 9, 2020, the market dropped some 2000 points, the third biggest loss in a single day on record, behind the crashes of black Monday 1987, & the crash of 2008; this is according to reports I have received from investment service experts. More large loss days made it one of the worst crashes in history, reported by some experts to be between 35-40 percent, I heard one report that it dropped some 50 percent then rebounded 20 percent making it about a % 30, percent fall ! But, some say the worst still has not happened, as they expect an eventual fall of over % 70. I am not so sure or certain about the “real” numbers, as I know things are not ever what they appear to be on the surface, especially in a manipulated, fabricated economy & system, where you always have a black market, & a black budget, most certainly in the trillions of dollars, that are never included or calculated by the so called “professional” “expert” economists, in their analysis of the economic condition of the global corporate “economy”.

A “ very large sell off, market “panic” has taken place, is the story we get, all of which has been blamed on the “Corona Virus” which some say may be biological warfare ! If that talk is true & the virus has caused this great drop in the stock market, then the virus has also served as an economic warfare weapon for any

foreign power wanting to bring down the US Stock markets & economy!

But, what if that story is wrong, or, only partially true, and there are other causes & contributory factors that may have influenced the recent drop in the US Stock markets, that certain sources just do not want to talk about, do not want it to capture any attention in the Media, or the Public at large ? Yet another misdirection, by distraction, and diversion ? the same old game & tactic that has been going on for a long time now ?

Let's have a look at other possible causes or catalysts for the 3000 & 2000 point drops in the Stock Market, & subsequent further fall. Recently an Article was published in the "Epic Times" News Paper, dated January 30-February 5, 2020, by Mark Tapscott, Washington, original Article published online at the Epic Times website, with the date January 24, 2020, Updated: January 28, 2020 under the headline:

"POLITICS"

"GAO Says Federal Trust Fund Bankruptcy Crisis Extends Far Beyond Social Security, Medicare"

[the initials "GAO" stand for "Government Accounting Office"]

"WASHINGTON—A new report contains blunt warning signs of an approaching fiscal crisis in Federal Trust Funds backing Social Security, Medicare, flood insurance, and many other programs, according to Senate Budget Committee Chairman Mike Enzi (R-Wyo)."

“The GAO’s new report is another warning sign that Social Security, Medicare, and other Trust Fund programs on which many Americans rely are in danger of going broke,” Enzi said, Jan. 23 in releasing the Government Accounting Office (GAO) analysis.”

“Congress will need to work in a bipartisan manner to safeguard these programs to ensure they are able to provide for those who need them now, and in the future,” Enzi said in a statement accompanying the release.

“Enzi and budget panel member Sen. Mike Braun (R-Ind.) requested the report, which took more than a year to complete .”

Braun said “the report highlights the need for political leaders to confront the trust fund problem without further delays.”

After that article was released, Senator Mit Romney made a statement regarding the same subject, that was posted on Youtube on January 28, 2020, viewed by tens of thousands of people, no doubt, in which he stated at one point:

“You know the numbers; the Government takes in about 3 trillion dollars in tax revenue, spends about 4 trillion, and we paid almost 300 billion dollars in interest on the Federal debt. That number, as the chairman has shown, is going to grow to be larger and larger and larger, and if interests rates were to rise for any host of reasons, why it could become an overwhelming number, where at some point we’d be spending more on interest than on our military. As you know two thirds of our spending is automatic, we don’t vote on it in the budget; Medicare; Medicade; Social Security; Highway trust fund, and so forth. Last week the GAO released a report,

confirming that the highway Trust fund will be insufficient in two years”...”

After Senator Romney's statement, Federal Reserve Board Governor Lael Brainard, hinting at possible changes coming to the way we will pay our debts in the near future, made the following statements in a speech at the Symposium on the Future of Payments, at Stanford Graduate School of Business, in California, on February 5, 2020, which speech can be obtained on line. See a PDF of the speech which is attached to the end of this article.

The speech was titled:

**“The Digitalization of Payments and Currency:
Some Issues for Consideration”;**

“By transforming payments, digitalization has the potential to deliver greater value and convenience at lower cost. But there are risks. Some of the new players are outside the financial system’s regulatory guardrails, and their new currencies could pose challenges in areas such as illicit finance, privacy, financial stability, and monetary policy transmission .”

“Given the stakes, the public sector must engage, in order to ensure that the payments infrastructure is safe, as well as efficient and fast, assess whether regulatory perimeters need to be redrawn, or new approaches are needed in areas such as consumer data, and identity authentication, and explore the role of central bank digital currencies in ensuring sovereign currencies stay at the center of each nation’s financial system.”

“Central Bank Digital Currencies”

“The prospect for rapid adoption of global stablecoin payment systems has intensified calls for central banks to issue digital currencies in order to maintain the sovereign currency as the anchor of the nation’s payment systems. In a Bank for International Settlements survey of 66 central banks, more than 80 percent of central banks report being engaged in some type of central bank digital currency (CBDC) work.¹² The motivations for this work, range from payments safety and robustness for advanced economies, to payments efficiency for emerging economies.”

“The latest survey suggests there is greater openness to issuing a CBDC than a year ago, and a few central banks report that they are moving forward with issuing a CBDC .”

“Building on the tremendous reach of its mobile payments platforms, China is reported to be moving ahead rapidly on plans to issue a digital currency.” ¹³

“Agenda Ahead”

“The digitalization of currencies and payments is being driven by technology players that are bringing new business models to this space and fresh attention to age-old questions. While the potential for seamlessly integrated and lower-cost transactions brings important benefits, digitalization also brings risks. In the United States no less than in other major economies, the public sector needs to engage actively with the private sector and the research community to consider whether new guard rails need to be established, whether existing regulatory perimeters need to

be redrawn, and whether a CBDC would deliver important benefits or not .”

Six days after the speech of Federal Reserve Board Governor Lael Brainard, on February 11, 2020, Federal Reserve Chairman Powell testified before the House Financial Services Committee, streamed live on youtube.com, and he was questioned about the said speech of Fed Governor Lael Brainard, on February 5, 2020, by Illinois Congressman Foster, who asked Powell the following questions about the state of progress of the US Federal Reserve Banks work on a possible US Digital currency under the Federal Reserve Banking system:

“So how would you characterize the, you know, your state of progress on this, compared to other countries, you know the Swedish Central Bank, developing the Ecrona, well, the Chinese, one of the reasons there was so much concern about the Liber project is they would immediately have scale, if they just rolled out the product. Another entity in position to do that is the Chinese Government, to roll out and scale, using their already established payment by cell phone systems they would immediately have scale comparable to Facebook, if they rolled that out. And so how would you characterize our ability to respond to this potentially competitive threat ?” (end 1:45:23)

Chairman Powell responded with:

“So we’re working hard on it, we have a lot of projects going, a lot of efforts going on that right now. we haven’t had the problem that many, of, you mentioned Sweden, a lot of the Northern European economies have moved away from cash, to a remarkable degree, and that really has not happened in the US economy, even though it seems like it must have happened with

our kids not using cash very much, none the less the amount of cash in the US economy continues to grow faster than nominal GDP.” (end 1:45:53)

Mr. Foster followed up with:

“If you look at the curb of adoption of payment by cell phone, you know it starts slowly and then all of a sudden it just happens and so that seems like that can, that transition can happen in just a coupe of years, and so we have to be able to respond, you know, if that’s the driving factor, than you know, we have to be in a position where we can respond, by you know, rolling out, for example a digital dollar on the couple year time scale.” (end 1:46:22)

Chairman Powell replied with:

“And I completely agree with that and I think, frankly, Libra, that is, really lit a fire under that, and it was a bit of a wake up call, that this is coming fast, and could come in a way that is quite wide spread and systematically important, fairly quickly, if you use one of those big tech networks like Libra did, so we’re working hard on it, we fully appreciate the importance of making quick progress, we have not decided to do this though.”....”

I think it highly probable that the forgoing reported, but somewhat suppressed, facts, after awareness about it had circulated around the Country, would eventually play as much a factor and cause of the stock market crash, as anything else you may have heard, including the ‘Corona’ virus, that some say is now in 89 countries, spreading fast around the world. However I think it also

probable they would probably, more than likely, rather talk about the spreading of the Corona virus, than all the defaults hitting at once, and all the Federal Trust Funds, where all the citizen government benefits are kept, going Bankrupt, because, although *the Virus might kill you*, it is a certainty that *millions of retired and elderly citizens, who depend on those Government benefits,* will likely, also die if they are without them, and what are the odds of losing your benefits, when all the trust funds are going bankrupt ? Well, they could be pretty dam good odds, don't you think ? While the chaos ensues about the world wide “pandemic”, “Corona virus”, *you do not hear a word about these pending economic catastrophes. That deafening silence is by Design, not an accident or co-incidence !*

According to a recent report I received from one of my Economic research services, *the wall street Journal has issued an economic doomsday forecast, that, starting on April 1, 2020, millions of people will begin defaulting on their payments; including rent, utilities, credit card payments,* stating, as well as

“An estimated \$20 billion in monthly retail real estate loans are due as early as this week,”; “Many retailers and restaurants have said they are not going to pay their April rents, which in turn poses a threat to the \$3 trillion commercial mortgage market.” And it’s not just small businesses. Large corporations are already defaulting on their payments ...Nike Inc. (NKE) is asking to pay half its rents. TJ Maxx is delaying payments to its suppliers. The Cheesecake Factory (CAKE) has notified landlords that it won’t pay April rent. Residential and commercial landlords everywhere have been flooded with requests from individuals and businesses saying they will struggle to pay their rent for April. And auto dealers have been

swamped by calls from customers to put off their April lease or loan payments. If American households could wait a few weeks for their government checks, it wouldn't be so bad. Or if companies could all get their small business loans at the drop of a hat, that would help too. But they can't. And even if they could, Larry Kudlow, the President's chief economic advisor, admits it's not going to be nearly enough. Most consumers and corporations in America have virtually ZERO CASH SAVINGS OR RESERVES. So now the dominoes are about to fall ... You will see a chain reaction of defaults by consumers and businesses, leading to ... a sudden surge in demand for short-term loans, while lenders recoil in horror ... and an avalanche of panic selling in the nation's massive debt markets. According to the Federal Reserve's latest release on March 12, 2020, (p. 7), that includes

- **\$4.2 trillion in credit card balances and consumer loans**
- **\$10.6 trillion in one-to-four family mortgages**
- **\$16.1 trillion in corporate debts, and**
- **\$3.1 trillion owed by cities and states**

This is no longer a forecast. It's a simple description of what is happening already as we speak" ...

According to my plain math calculations those numbers amount to 34 trillion dollars of debts over due now ! Yes there appears to be real cause for a further crash of the stock market and the economy to come soon....

Well maybe someone is hoping all those elderly & retired folks catch the Corona virus & go away, so they don't have to worry

about paying them anymore ? Sound cold, cruel, and callous to you ? Just remember in 1972, after the preparation of Memorandum 200 by Henry Kissinger, Secretary of State under the Nixon Administration, following a six month “study” on the state of world “over-population” “Memorandum 200” was quietly classified “Top Secret ” which actually means that the “ Government ” adopted the recommendations in the document which called for the immediate implementation of a world wide policy of population reduction in all countries around the world, which, in fact included and still includes the good old USA !

You must remember, that the people who force such ‘mandatory’ policies upon all the rest of us, are ‘Globalists’ or ‘Internationalists’, who have no allegiance to any individual country or Nation;

to them the whole world is a ‘Chess Board’, and this is all their personal private game of Chess, & we all, are their personal private game pieces, which they like to manipulate at will with impunity, with no real regard or care for our personal ramifications, injury, harm, damage, or suffering ! See the book titled: “The Grand Chessboard: American Primacy and Its Geo-strategic Imperatives” published in 1997, which is one of the major works of Zbigniew Brzezinski, who is considered to be one of the most influential men of our so called modern era ! Yes, to hell with the consequences, that is, as long as it is “the many” who are paying the toll & the price, and suffering the unjust, unfair, harm, damages, injury, & pain, leaving “the few”, the “Ruling Class” immune and exempt from any such uncomfortable inconveniences of “life” on “planet Earth” !

You can also read the book titled:

“Between Two Ages, America’s Role in the Technetronic Era”
published in 1970, also by Zbigniew Brezinski, which is one of his most well known and best selling books, where he talks about the coming technology that will be employed by Governments around the world affecting the minds of populations of people, and also the weather, coming into manifestation by the year 2018.

After all, why shouldn’t “the many” pay the way, for a few free loaders who deem themselves far better, superior, and worthy as the elite ‘Ruling Class’ of the World, who should be placed above and beyond, upon a pedestal to look down upon the great unwashed who are made to wallow in the mud and mire ?

At page 9 chapter 1 of his book “Between Two Ages: Americas Role in the Technetronic Era”, 1970, Zbigniew Brzezinski states:

“The transformation that is now taking place, especially in America, is already creating a society increasingly unlike it’s industrial predecessor. The post-industrial society is becoming a “technetronic” society: a society that is shaped culturally, psychologically, socially, and economically, by the impact of technology and electronics-particularly in the area of computers and communications .” See the book Impact of Science on Society” by Bertrand Russell, first published in 1952.

At page 56 Brezinski states: “The Nation state as a fundamental unit of mans organized life has ceased to be the principal creative force: ‘International banks and multinational corporations are acting and planning in terms that are far in advance of the political concepts of the nation-state ’ ”⁴⁴ “But as the Nation state is gradually yielding its sovereignty , the psychological importance of the national community is rising, and the attempt to establish an equilibrium between the imperatives of the new internationalism and the

need for a more intimate national community is the source of frictions and conflicts. The achievement of that equilibrium is being made difficult by the scientific and technological innovations in weaponry. It is ironic to recall that in 1878 Friedrich Engels, commenting on the Franco-Prussian War , proclaiming that weapons used have reached such a state of perfection that further progress which would have any revolutionizing influence is no longer possible.”⁴⁵

“Not only have new weapons been developed, but some of the basic concepts of geography and strategy have been fundamentally altered; space and weather control have replaced Suez or Gibraltar as key elements of strategy.” (end page 56)
“..”..”future developments may well include automated or manned space warships,” (Pres. Donald Trump recently announced activation of the new Space Defense Agency in 2019) “deep sea installations, chemical and biological weapons, death rays, and still other forms of warfare—even the weather may be tampered with.”

These words hearken forward in time to the developments of “HAARP” in Alaska, & present “Geo-engineering” “climate Engineering” programs around the world, employing weather modification & manipulation.

They say that “Memorandum 200”, was “declassified” in 1985, some 13 years later, after the implementation of the world wide policy of population reduction ! I obtained a free PDF of the said declassified “Memorandum 200”, several years ago, and after reading it and doing more research on world population reduction policy, I began a show on the world wide web on the “Talk Shoe” Network, that was called “**By The Numbers**”, in the year 2014. The last show that I did, was to

be two parts, on the history of genocide & “population control”, but the “part 2”, where I was to bring the audience up to date with the present, magically, never happened, due to a very mysterious inability of the technology to transmit my voice anymore, though the so called ‘expert technicians’, assured myself and the Narrator of the show, that everything was working just fine, and all technology was in good operational form.... Everyone should be able to hear my voice.....but after checking with outside sources, third parties who were tuning in to the show, no one could hear my voice ...and that was the end of ‘the show’, no more broadcasts were done, due to the inability of anyone to hear my voice !

This memorandum 200, in 1972, was the culmination of, and implementation of an elaborately conceived agenda and strategy to reduce populations around ‘the globe’ to fit the agenda of the world wide elite, and their “New World Order”, who consider themselves the ‘Ruling class’ of the whole world ! For a concise chronology of the relevant history of the elite development of this agenda, first review the Malthusian Philosophy behind it, of Thomas Malthus 1766–1834. In 1798, it is reported, that Malthus had published, anonymously, An essay on the principle of population as it affects the future improvement of society, in which he called attention to the disparity between the rate of population growth & slower increase of the food supply. War, famine, and disease, he pointed out, had to be the eventual alternatives to the limitation of family size. We are informed that his book caused furious controversy and led him to prepare a more scholarly work. First, though, he took two extensive tours of the continent with some friends, collecting statistics, noting local customs, & social history, as well as a study of population trends in North America. His second book, published in 1803, was a much larger sociological treatise deploying much data, with which he focused on political economy & the notion of moral

restraint . As the controversy continued, his publisher John Murray wrote:

“It has been frequently remarked that no work has been so much talked of by persons who do not seem to have read it!”

In 1830 Malthus published a third work titled: “A summary view of the principle of population.” The extracts from these works that follow give the flavour of his ideas and philosophy:

“I think I may make fairly, two postulata. First, that food is necessary to the existence of man. Secondly, that the passion between the sexes is necessary and will remain nearly in its present state ... Assuming then my postulata as granted, I say, that the power of population is infinitely greater than the power in the earth to produce subsistence for man. Population, when unchecked, increases in a geometrical ratio. Subsistence increases only in an arithmetical ratio. A slight acquaintance with numbers will show the immensity of the first power in comparison of the second. By the law of our nature which makes food necessary to the life of man, the effects of these two unequal powers must be kept equal. This implies a strong and constantly operating check on population from the difficulty of subsistence. This difficulty must fall somewhere and must necessarily be severely felt by a large portion of mankind....”

“This natural inequality of the two powers, of population, and of production in the earth, and that great law of our nature which must constantly keep their efforts equal, form the great difficulty that appears to me insurmountable in the way to the perfectibility of society...”..”

In his book “The Impact of Science on Society” 1952, Bertrand Russel takes up the exact same subject started by Thomas Malthus, back in 1798-1803. After that, a book on the same subject titled

“The Population Bomb” was published in the year 1968, written by Paul R. Ehrlich, based, yet again upon the exact same subject. The same year, the “Club Of Rome” was founded in 1968, the first book related to it was published in 1972, written by Donella H. Meadows, Dennis L. Meadows, Jorgen Randers; William W. Behrens III; Universe Books ISBN 0-87663-165-0, which is listed on their website at <https://www.clubofrome.org/report/the-limits-to-growth/> ;

Of course, there are extensive financial and economic impacts inseparable from any such global policy !

We can only wait and see the impact of “corona virus” in a global “epidemic”-“pandemic”, if that is, in fact what we now have, as has been claimed by a number of sources, including of course, the “main stream media” & other Government Agency Officials, along with corporate world “experts” on viral breakouts, with Doctorates & Masters Degrees, & all appropriate licenses & certificates talking about how slow it is to develop a “vaccine” to fight this God-Awful monstrous germ, that there is no cure for, that may end up killing us all, if we do not stay home, practice “social distancing” do all our shopping on line, & strictly obey without question or doubt the edicts, decrees, and executive orders of Governors and mayors, & at least consider the suggestions & guidelines of the President of the United States !

In number 5 of this series I will cover the statements of a former Federal Government Official regarding a coming global digital currency system, as well as fast developing changes of crypto currencies around the world.
